

A Web solution powered by your experience

We think the way you do.

PARASOLUTION® speaks your language and adapts easily to your organizational needs. Designed by PREMIER CONTINUUM, PARASOLUTION® is the ideal Web-based solution for optimizing the management of your Business Continuity or Emergency Response Plans.

PARASOLUTION®'s key strength lies in the power, user-friendliness and flexibility generated by a clever and novel combination of database management and **Microsoft Word®** software.

At last! A reliable and affordable Web-based solution is available for easy periodic updating and sharing of your vital information...
because we think the way you do.

PARASOLUTION® ALLOWS YOU TO:

Easily develop and maintain your plans.

Access up-to-date information anytime and securely.

Centralize data for all of your plans and promote contributions by all authorized users.

Easily and effectively communicate the right information to your team members.

PARASOLUTION®

PARASOLUTION®. A software application designed, supported and distributed by PREMIER CONTINUUM INC.

PARASOLUTION®: the only software application that offers the simplicity of the Web, the user-friendliness of Microsoft Word® and the outstanding performance of its computerized data management module.

We know, as you do, that to successfully implement and maintain a Business Continuity or Emergency Response Plan, it is important to:

- build a strong team... and have the right people in the right place.
- establish the right procedures, ensure they are realistic, and communicate and update them efficiently.
- access the correct information... updated and complete.
- have the proper tools... reliable and easy to use.

PREMIER CONTINUUM developed PARASOLUTION®, **the Web-based solution that most closely matches your true needs**, based on field experience acquired in the development and maintenance of Business Continuity Plans in large organizations.

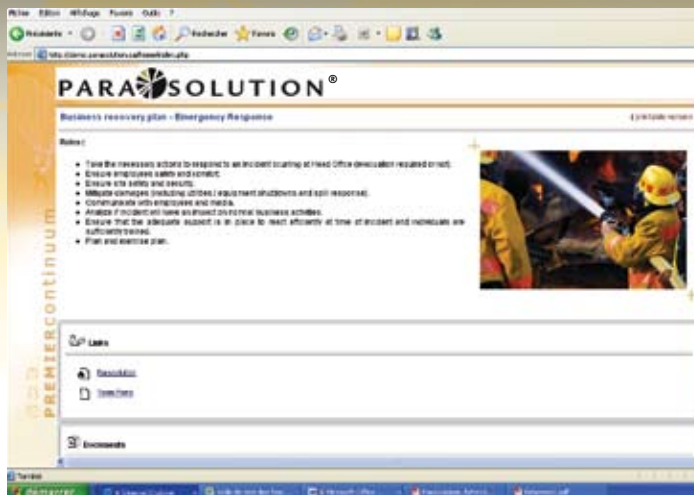

PARASOLUTION® delivers the ideal tool to support you in achieving resiliency.

Moreover, PREMIER CONTINUUM sells its PARASOLUTION® software at a more cost-effective price than that of similar product offerings.

As manager or administrator of a Business Continuity or Emergency Response Plan, you will appreciate the flexible database access that PARASOLUTION® provides, when it comes to your strategy analysis and orientation, and updating of information.

Your occasional users, when called upon to develop or maintain plans, will need very little time to get up to speed with PARASOLUTION®, because of their prior experience with Web browsing and Microsoft Word®.

PARASOLUTION® offers the ease of use of the Web

Browse on simple, clear Web pages.

Create, with a simple edit interface **(no knowledge of HTML is required)**,

Web pages for developing and managing specific plans.

Add or modify each page and its content (text, image, hyperlinks and other documents).

Perform each task with the help of a friendly online help wizard.

Thanks to the user-friendliness of Microsoft Word®, PARASOLUTION® simplifies information updating

PARASOLUTION® offers templates*, created in Microsoft Word® format, as data entry forms. The templates are made of information sections, linked to a database, as well as free-text sections that users can modify and customize at will, taking advantage of familiar Word® functionalities. They are very useful for updating documents such as telephone lists, technology and equipment requirements, risk and impact analyses, and more.

An onscreen message alerts the user of the need to update a certain document. Once the update has been completed, a link to the document is displayed in the "What's New?" zone for all users with access privileges to see.

PARASOLUTION® allows the administrator to transmit generic or custom e-mail alerts requesting that updates be performed. Default automated reminders, found in PARASOLUTION®, can also be modified by the administrator.

PARASOLUTION® sends weekly reports (e.g., modifications, additions, imminent updates, delays) to the administrator for monitoring and follow-up purposes.

* PREMIER CONTINUUM can also create custom templates to match the specific needs of your organization.

PARASOLUTION® FEATURES A POWERFUL AND INNOVATIVE COMPUTERIZED INFORMATION MANAGEMENT MODULE.

PARASOLUTION®'s Premier Document Server (PDS), has been specifically developed to ensure simultaneous and continuous updating of information, contained in proprietary templates created in Microsoft Word®.

PDS sequentially scans each document, detecting additions, deletions and modifications made by individual users, and processing only identified changes. At the end of each day, it performs a refresh of all documents that share modified information. Users can also manually request an immediate update of these documents.

PARASOLUTION® also supports data importing from other existing databases.

PARASOLUTION® adapts to your organizational culture

MULTILINGUAL CAPABILITIES AND LANGUAGE CHARACTERISTICS

PARASOLUTION® offers, in both English and French languages, proprietary templates created in MS Word®, pages, menus and files. Users can toggle from one language to the other while remaining on the same screen page. If only one version of a file is available, PARASOLUTION® displays it to the user regardless of the latter's language preference.

The administrator can also adjust PARASOLUTION®'s terminology to that of the organization.

CUSTOMIZATION, FILTERING AND SECURITY, BASED ON AUTHORIZED ROLES

PARASOLUTION® controls the display of information and access privileges, based on individual users' roles and on a team's level of responsibility.

ENHANCED COMMUNICATION CAPABILITIES AND AVAILABILITY OF INFORMATION

PARASOLUTION®'s functionalities support teamwork and information sharing, and prevent task duplication, by keeping track of the roles and responsibilities of each individual user.

Because PARASOLUTION® is a Web-based solution, it does not require installation on individual workstations, and it allows all users to consult their own plans regardless of their geographical location.

PARASOLUTION® is hosted at a data centre that follows industry best practices in data security and availability.

PARASOLUTION® also supports downloading of documents to personal digital assistants (PDAs) and SMS text messaging for emergency notifications.

PREMIER CONTINUUM has been operating out of Montreal, Canada, since 1997. It is a provider of unique products and services in the field of Business Continuity, Emergency Response and Risk Management. The company's innovative and dynamic approach has won PREMIER CONTINUUM the trust of major organizations.

With their field experience, the firm's specialists were in an ideal position to evaluate existing software applications against user needs and come up with PARASOLUTION®, the Web-based solution that best suits your requirements.

They think the way you do.
